

Tools and Equipment Catalogue Volume 4

Pros know professional results start with professional gear.

Purpose-built to help with ease, speed and coverage, Dulux Professional provides painters with everything needed to deliver a premium finish.

Just like the paint, you can always rely on Dulux Professional tools and equipment to support the painting process from start to finish. The comprehensive range of high quality, tried and trusted products help get the job done faster.

When you're a pro, you know.

Dulux Professional offers a full range of brushware, constructed using high quality materials for long life durability.

Handle

Dulux Professional brushware have raw timber handles that are FSC® certified.

By choosing FSC® certified products, you are supporting responsible management of the world's forests.

Epoxy Resin

High quality glue is used to bond the filament to the ferrule to prevent bristle loss.

Pins

The ferrule is attached to the handle with three high quality, stainless steel pins to prevent rust, reduce movement and provide durability.

Wedges

Quality wedges are inserted inside the ferrule to ensure the brush maintains its shape.

Ferrule

Durable stainless steel ferrule connects the handle and the filament. It is firmly nailed to the handle to ensure sturdy construction. Size and shape will vary depending on the brush type.

Filament

Bristles are made from a premium, specialised filament blend to ensure excellent paint pick up and uniform finish. The tapered filaments offer greater precision and control. Bristles will vary in length and thickness according to the brush type.

Dulux Professional brushes deliver reliable performance for all applications, with handles and bristle profiles designed for the trade professional.

Sash Cutter

A full-bodied cutting in brush with a thin profile, and long handle to balance the weight of the brush. Sash Cutters are ideal for cutting in doors, ceilings and walls.

Angle Cutter

Designed with filament that sits on an angle rather than straight, for sharper, more accurate cutting in. Angle Cutters are ideal for cutting in around complex areas such as decorative cornices, ceiling roses and trim.

Oval Cutter

The rounded, thinner profile of an Oval Cutter allows it to wrap around curves and details, creating a sharp edge when cutting in. The longer handle enhances control, and the slightly tapered profile produces a very smooth finish.

Wall Brush

With a shorter handle than a cutter brush, wall brushes have more filament thickness to hold more paint, making them ideal for painting larger areas such as walls, doors and weatherboards. A variety of widths available for different jobs.

Slim profile also available for more control when painting finer detail areas.

Built for Professionals

- ◆ Premium filament blend to hold paint well and ensure even paint release.
- ◆ Bristle profiles and handles designed for excellent control and precision.
- ◆ High quality construction for filament retention and to provide long life durability.

Dulux Professional Wall Brush

Ideal for painting larger areas such as walls, doors, weatherboards and exterior surfaces.

Available Sizes

38mm, 50mm, 63mm, 75mm, 88mm

Dulux Professional Sash Cutter

Ideal for cutting in around doors, walls, ceilings, fascias and soffits.

Available Sizes

38mm, 50mm, 63mm, 75mm

Dulux Professional Slim Brush

Ideal for painting smaller areas and finer detailed work.

Available Sizes

50mm, 63mm, 75mm

Dulux Professional Angle Cutter

Ideal for edging around more complex areas such as decorative cornices, ceiling roses and trim.

Available Sizes

50mm, 63mm

Dulux Professional Oval Cutter

Ideal for painting curves or details, and cutting in areas where a very smooth finish is desired.

Available Sizes

50mm, 63mm, 75mm

Invest in Dulux Professional's durable brushware for a quality finish over single use alternatives.

Dulux Professional roller covers provide trade professionals with reliable performance, excellent finish and long lasting durability.

Quality material

Dulux Professional roller covers are made using high quality materials to ensure excellent paint loading and release. Various fibre options are available to suit the application.

Length

Length of rollers vary depending on the size of the project.

The Dulux Professional range offers mini sizes in 100mm & 160mm and larger sizes in 230mm, 270mm & 360mm.

Bonding

Fabric is strongly bonded to the roller core to ensure secure attachment and prevent delamination.

Core

Quality core construction ensures a good fit with the roller cage, and provides longevity to withstand frequent cleaning.

Nap

Roller covers are available in a range of nap lengths to suit different projects and paint types.

Use the guide below to help choose the right nap for your project.

Short

3-6mm nap
Doors & trim

Used for smooth surfaces such as timber doors. The best choice for Gloss and Semi-Gloss paints.

Medium

10-18mm nap
Walls & ceilings

The best choice for smooth to semi-smooth surfaces such as plasterboard, set plaster and cement sheet. Use with Flat, Matt and Low Sheen paints.

Long

20-24mm nap
Rough & textured surfaces

Best for textured and rough surfaces, particularly exterior substrates such as render and concrete, with high build paints.

Extra Long

24+mm nap
Bricks & blockwork

Extra long nap is ideal for bricks and blockwork to ensure paint is effectively applied to the mortar lines and uneven surface.

Built for Professionals

- ◆ Premium quality fibres are used to provide an excellent finish and long life performance.
- ◆ A range of fibre types available to provide options for most paints and projects.
- ◆ High quality construction to ensure reliable performance and excellent durability.

Various fibre options are available to suit different paints and surfaces, it is important to consider which fibre will give you the best finish for your chosen paint and project.

Polyester

Dulux Professional Polyester roller covers have been designed specifically for professional painters. Made using premium polyester fibres from the USA, they are highly durable and a great general-purpose cover producing a good balance of paint loading, film thickness and smooth finish.

Can be used with water-based or solvent-based paints, for large internal or external areas such as broadwalls or ceilings with Flat, Matt or Low Sheen paints. Longer naps are available for rough or textured surfaces and high build paints.

Paint hold					
Film thickness					
Smooth finish					
Durability					

Dacron®

Dacron is a woven fabric made in the USA, that produces a high quality, exceptionally smooth finish.

Dulux Professional Dacron roller covers are only available in an 18mm nap, to achieve similar film thickness to a 15mm nap Polyester roller cover. They are the best choice for applying interior water-based paints such as Dulux Professional Ceiling Flat, Dulux Professional Interior and Dulux Wash & Wear.

Paint hold					
Film thickness					
Smooth finish					
Durability					

Lambswool

Made from 100% Australian wool, Dulux Professional Lambswool roller covers have excellent paint holding capacity, making them efficient to use over large areas. They tend to have a longer nap than synthetic covers because natural fibres wear down with use.

They are highly durable and suitable for both water based or solvent based paints. They are a good option for applying Undercoats. Flat or Matt paints.

Paint hold					
Film thickness					
Smooth finish					
Durability					

Microfibre

A common woven fabric that produces a very smooth finish and low tendency to shed, but is not as durable as other fabrics. Dulux Professional Microfibre roller covers use premium quality microfibre to ensure a very smooth finish but apply a very low film thickness of paint.

They are ideal for applying gloss and semi-gloss paints on surfaces where a smooth finish is desired, such as doors.

Paint hold					
Film thickness

Dulux Professional Washi Tape is stronger and thinner than crepe-based tapes.

Dulux Professional Washi Tape - Green

Everyday painter's masking tape for clean, sharp lines – prevents paint bleed*

30-day clean removal.

30-day UV resistance.

Made for AU & NZ conditions – resistant to 100°C.

Width	Length	Pack Size
24mm	50m	1, 6
36mm	50m	1, 6
48mm	50m	1, 4

Dulux Professional Washi Tape - Yellow

Produces the sharpest lines, every time - prevents paint bleed*

60-day clean removal.

60-day UV resistance.

Very thin – produces minimal paint edge & conforms well to curved surfaces.

MADE IN JAPAN

Width	Length	Pack Size
24mm	55m	1, 6
36mm	55m	1, 4

Get the edge!

All your masking needs sorted

- Tape, film and paper
- Pre-taped and plain
- Dispensers and refills

Pro Tip

For the cleanest lines, remove tape soon after painting, before the paint fully cures.

*Tape must be pressed firmly on to the surface. Do not use on wet or damp surfaces, or in temperatures below 10°C, as this will affect tape adhesion.

Washi tape with plain film or paper. Join us!

Dulux Professional Masking Film

Corona treated to promote paint adhesion for multiple coat use.

Statically charged to assist film to cling to flat surfaces.

Works best with tape applicators and maskers.

Ideal for use with Dulux Professional Washi Tape.

Width	Length
0.6m	55m
1.2m	55m
1.8m	27.4m
2.7m	27.4m

Dulux Professional Masking Paper

Durable, more tear resistant 'Kraft' paper.

Machine glazed to prevent paint bleed through.

Bulk roll packs – ideal for use with Dulux Professional Washi Tape.

Width	Length
150mm, 300mm	50m

How Pros keep their edge!

Dulux®

envirosolutions™

Recovery Program

The Dulux Envirosolutions Recovery Program is an Australian Government accredited product stewardship scheme. The program aims to divert used plastic 15L paint buckets from landfill. Used plastic buckets, lids, and tear strips are collected and manufactured into recycled, Australian-made products. The recycled products are then sold through Dulux Trade Centres, participating Inspirations Paint stores and Paint Spot. The Dulux Envirosolutions Recovery Program is a complimentary service, with the ambition to divert waste paint buckets from landfill.

REDUCE LANDFILL
SAVE WASTE COSTS
USE ENVIROSOLUTIONS

1.

Return your used 15L plastic paint buckets, lids and tear strips to a participating store.

2.

Once collected, plastic is granulated and processed into tiny pieces.

3.

Recycled granules are used to create trays, buckets and stirrers!

The Dulux EnviroSolutions Recovery Program – How it works
Buckets can be returned to participating stores or via an on site Dulux EnviroSolutions Collection Point.

What buckets can be returned?

A wide range of Dulux, Berger, Porter's Paints, Hadrian, Acratex and Fosroc 15L plastic buckets can be returned.

What cannot be returned?

Solvent based paint, paint with grit including render, silanes, and some Dulux Precision products are not accepted.

For more information about which buckets can be returned, contact your Dulux Sales Representative.

Painters returning 30% of their buckets can qualify as a Dulux EnviroSolutions Painter and can access the logo to use across their business. To get started, talk to your Dulux Sales Representative.

Registration including training is available through the QR code.

EnviroSolutions Products

The Dulux EnviroSolutions range of products includes painting accessories made from our collected used paint buckets. Our products are available for purchase across Dulux Trade Centres, Paint Spot stores and participating Inspirations Paint stores.
